

FOR GPs & HEALTHCARE PROFESSIONALS

Private addiction support. A considered next step.

A Cornwall-based point of contact for adults exploring structured online recovery support or private residential treatment in the UK and internationally.

TWO ROUTES, GUIDED BY INDIVIDUAL NEED

01 / SUPPORT AT HOME

Structured online recovery support

Individual support for medically stable adults who need a structured approach to recovery alongside work, family or life after residential care.

- One-to-one sessions and practical recovery work.
- Relapse-prevention planning, accountability and regular review.
- Insight OS tools for reflection, check-ins and recovery planning.

Frequency, availability and fees are agreed after a suitability conversation.

02 / TREATMENT PLACEMENT

Private residential treatment guidance

Personal guidance for adults and families considering private rehab, with support to compare providers and plan the move into care.

- UK and selected international treatment options.
- Care needs, provider capabilities, complete costs and practical arrangements.
- Admission coordination and consideration of continuing support.

The provider carries out its own clinical assessment and decides on admission.

The starting point is the person's needs.

Patients do not need to choose a service or a facility before contacting IRN.

A PERSONAL POINT OF CONTACT

A personal contact. A clear way forward.

Craig Bilton

FOUNDER & CLINICAL DIRECTOR

Based in Newquay, Craig brings more than 20 years of international experience in addiction treatment, recovery programme management, interventions and treatment placement, including work in South Africa, Thailand and Sri Lanka.

A STRAIGHTFORWARD INTRODUCTION

01

Start simply

Patients can contact IRN directly. For a professional introduction, contact us first to agree the route and consent arrangements.

02

Clarify the next step

We discuss needs, suitability, options and fees. Residential admission remains subject to the provider's assessment and acceptance.

03

Agree communication

With patient consent, we can agree what information to share with the GP or other professionals involved in their care.

SCOPE & RESPONSIBILITY

IRN is a private support and treatment-guidance service, not a regulated healthcare provider. We do not provide diagnosis, prescribing, medical detox or emergency care.

FEES & RELATIONSHIPS

Before anyone proceeds, we explain IRN fees, separate provider charges and relevant commercial or referral relationships, including any provider payment to IRN for a placement.

Let's introduce ourselves.

A brief call or a visit to your Cornwall practice.
